| Foreword | 1 |
| Introduction | 3 |
| Chapter 1. Perspectives on animal learning theory | 7 |
| Part 1. Comparing training concepts and styles | 7 |
| <i>Ian G. McLean</i> | |
| References | 10 |
| Part 2. General learning principles for training REST dogs | 11 |
| <i>Rune Fjellanger</i> | |
| Creating a desired behavioural pattern | 11 |
| Shaping | 12 |
| • Shaping with the clicker ... | 13 |
| Multiple-choice training | 15 |
| Stimulus discrimination | 15 |
| • Scent discrimination and threshold for detection: an example of discrimination training ... | 16 |
| Reinforcement | 17 |
| • Positive and negative reinforcers ... | 18 |
| • Distribution of reinforcement — intermittent reinforcement ... | 18 |
| References | 21 |
| Part 3. Principles of animal learning | 23 |
| <i>Stewart Hilliard</i> | |
| Summary | 23 |
| Introduction | 25 |
| Animal learning | 26 |
| • Habituation ... | 26 |
| • Classical conditioning ... | 28 |
| • Instrumental conditioning ... | 30 |
| Primary and secondary reinforcement and punishment | 32 |

| | |
|---|-----------|
| Systems of instrumental training | 33 |
| • Inducive training ... 33 • Compulsive training ... 33 • Application of inducive training ... 34 • Successive approximation and shaping ... 35 | |
| Reward schedules | 35 |
| • Application of reward schedules ... 37 • Advantages of variable reward schedules ... 37 | |
| Application of compulsive training | 38 |
| • Use of physical punishment ... 38 • Use of negative reinforcement ... 39 | |
| Generalisation of classical and instrumental conditioning | 41 |
| Generalisation of behaviour learned in one context to another context | 41 |
| Transfer of learning | 42 |
| Chapter 2. Case studies on training mine detection dogs | 43 |
| Part 1. Socialising puppies for demining | 43 |
| <i>Johan van Wyk and André Le Roux</i> | |
| Introduction | 43 |
| Choice of parents | 44 |
| Care of the dam | 45 |
| The new arrivals | 45 |
| The socialisation process for the first 16 weeks | 45 |
| • Neonatal period (0-2 weeks) ... 45 • Transition period (third week) ... 46 | |
| • Socialisation (3-6 weeks) ... 47 • Socialisation (6-8 weeks) ... 48 | |
| • Socialisation (8-12 weeks) ... 49 • Socialisation (12-13 weeks) ... 49 | |
| • Socialisation (13-14 weeks) ... 50 • Socialisation (14-16 weeks) ... 50 | |
| Programme for 4-8 months | 51 |
| Programme for 8-12 months | 51 |
| Part 2. The REST concept | 53 |
| <i>Rune Fjellanger</i> | |
| Introduction | 53 |
| • The REST case studies: collecting information ... 54 • The REST system in operation ... 55 • Sampling ... 55 • Breaching ... 56 | |
| • Analysis of new filter cartridges ... 58 • Handling the filter cartridges and filter containers prior to and during the analysis process ... 60 | |
| Training methodology for vapour analysing dogs: three case studies | 61 |
| Case study 1: Mechem | 61 |
| • Collecting information ... 62 • General ... 62 • Selection of dogs ... 62 • The training programme: explosive odour imprinting ... 63 • The training programme: improving discrimination ... 65 • Assessment of dogs during training ... 66 | |
| • Maintenance training ... 66 • Use of REST in the execution of survey contracts: scent trapping and analysis ... 67 | |
| Case study 2: Norwegian People's Aid | 69 |
| • The REST project in Angola ... 69 • Collecting information ... 70 | |
| • Dog selection ... 70 • Training ... 71 • Explosive odour imprinting ... 72 • Assessment of dogs during training ... 74 | |
| • Maintenance training ... 74 • The analysis process ... 76 | |

| | |
|---|-----|
| Case study 3: Norsk Kompetansesenter for Spesialsøkshund AS (NOKSH AS) | 77 |
| • Organisation of the work ... 77 • Selection of dogs ... 77 | |
| • Training ... 79 • Explosive odour imprinting ... 81 • Monitoring progress: methods and results for assessment of dogs during training ... 86 • The training programme for REST dogs at NOKSH ... 87 • Maintenance training and operational use ... 91 | |
| • Procedures for testing unknown filters ... 91 | |
| Analysis and discussion | 92 |
| • Sampling ... 93 • Filter cartridges ... 93 • Training of REST dogs ... 95 • Assessment during training ... 97 • Maintenance ... 98 | |
| • The operational analysis of filters ... 98 • Further development of REST ... 99 | |
| References | 101 |
| <i>Annexes:</i> | |
| 1. Equipment requirements in training of REST detection dogs | 102 |
| 2. Examples of sampling, analysis and assessment forms used in REST dog training | 105 |
| Part 3. Training dogs to detect tripwires | 109 |
| <i>Dan Hayter</i> | |
| Tripwire protocol | 109 |
| • Lessons learned ... 109 • Introduction of tripwires ... 109 | |
| <i>Annexes</i> | |
| 1. Protocol for tripwire testing | 118 |
| 2. Interim study report and summary of results, 10 July 2001 | 120 |
| 3. Interim study report and summary of results, 27 February 2001 | 125 |
| 4. Interim study report, 20 January 2001 | 127 |
| 5. Chemical analysis of tripwires | 129 |
| Chapter 3. Training, organisation and skills: case studies of practice using mine detection dogs | 139 |
| <i>Per Jostein Matre</i> | |
| Introduction | 139 |
| Objectives | 139 |
| Methods | 139 |
| Results | 141 |
| • Identification of test criteria for the selection of mine detection dogs ... 141 • Guidelines for the training and handling of mine detection dogs ... 142 • General guidelines for educational programmes for trainers and handlers ... 142 | |
| Discussion | 142 |
| • Training methods ... 142 • Information flow within organisations ... 143 | |
| Principles of practice | 146 |
| • Trainer and handler abilities ... 146 | |
| Summary and conclusions | 147 |
| References | 148 |

Annexes:

| | |
|--|-----|
| 1. System and practice at organisation N1 | 149 |
| 2. System, collation of knowledge, and management of organisation N2 | 152 |
| 3. Process and collation of knowledge at organisation N3 | 154 |
| 4. Organisational requirement at N4 | 158 |
| 5. Skills and knowledge needed when working with dogs | 160 |

Chapter 4. Programme reviews**Part 1. The Mechem Explosive and Drug Detection System (MEDDS)** 165*Vernon Joynt*

Background 165

The MEDDS landmine clearance system 166

Research and development on MEDDS 167

MEDDS 168

- Chemical tests ... 168
- Other Mechem tests ... 169
- Detection distance ... 169

Operational results for MEDDS 170

- Trusting only negative results ... 170
- Use statistics to achieve the 99.6 per cent UN standard of clearance ... 170
- Enhanced MEDDS ... 171
- Area reduction ... 171
- Comparison with manual demining ... 172

Part 2. Preliminary results on the use of *Cricetomys* rats as indicators of buried explosives in field conditions 175*Ron Verhagen, Christophe Cox, Robert Machangu, Bart Weetjens, and Mic Billet*

Summary 175

Introduction 176

Why rats? 177

- How rats came into the picture ... 177

Which rat? 177

- *Cricetomys gambianus* ... 178
- Field application of the rat technology ... 180
- Material and methods ... 180

Results 183

- Overall performance ... 184

Conclusions 192

References 193

Chapter 5. Odour detection: the theory and the practice**Part 1. How do dogs detect landmines? A summary of research results** 195*Ann Göth, Ian G. McLean and James Trevelyan*

Summary 195

Introduction 196

Aim 197

Acknowledgements

This document summarises the results of research from the first two years of the Mine Detection Dog (MDD) Research Programme, which was initiated by the GICHD in 2000. It was prepared by the GICHD on behalf of the mine dog detection industry, who have contributed to its development in many ways. Some contributions were sourced from outside the GICHD research programme because they are of central interest to the use of dogs for mine detection. The GICHD gratefully thanks all the authors who contributed for their time and efforts.

Production of this document for the GICHD was managed by Ian G. McLean. Editing was by Ian G. McLean and Jack Glattbach. Layout was by Françoise Jaffré.

The ongoing efforts, support and contribution of the MDD Advisory Group are acknowledged with thanks. The following donors provided project funding: the Governments of Germany, Japan, Norway, Sweden, the United Kingdom and the United States.
