A new look - website

The screenshot shows the GICHD website with a new layout. The browser address bar shows <http://www.gichd.org/>. The website header includes the GICHD logo and the text "Geneva International Centre for Humanitarian Demining" and "Centre International de Déminage Humanitaire | Genève". A search bar is located at the top center. The left sidebar contains a navigation menu with the following items: ABOUT GICHD, OPERATIONAL ASSISTANCE & RESEARCH, INSTRUMENTS OF INTERNATIONAL LAW, SHORTCUTS, AP MINE BAN CONVENTION, INTERNATIONAL MINE ACTION STANDARDS (IMAS), INFORMATION MANAGEMENT IMSMA, and BULLETIN BOARD. The main content area features three images: a minefield, a demining operation, and a person working in a field. Below the images is a text block starting with "As a part of the outreach of the mechanical study programme at GICHD, a team visited Azerbaijan in June last year..." and a link "More about Mechanical Clearance". The right sidebar contains "INFO RESOURCES" with links to Publications, Calendar, Links & Information Database, Mine Action and ERW Facts, Current Edition, Photo Gallery, Other Languages, and New on this Site. The footer includes "Site Map | Address | Contacts" and "© GICHD, 2007".
