General description

The Detonator Containment Unit DCU 105 / 212 is widely used by NATO, military personnel, EOD teams worldwide and de-mining companies. It also has applications in demolition, quarrying and construction.

Working characteristics

Contains the blast and secondary fragments protecting personnel when carried by hand.

Enables detonators and explosives to be stored and transported in the same vehicle

Improves logistical options and significantly reduces transport costs

Very low maintenance costs

Robust hard-wearing unit with nonconductive coating

Lightweight and easy to carry by hand

Suits a wide variety of detonators

RF screening

Durable and easily cleaned

Suitable for belt and rucksack transport

Ease of use even with gloved hands

Dimensional data

Length	212.00 mm
Weight	0.4 kg

Factory support data

Water resistant

Price

Base price	401 €
