

EORE AG

Explosive Ordnance Risk Education Advisory Group

Work Plan 2023-2024

The EORE AG Work Plan defines the group’s key outputs and activities for a 2-year period, to be implemented in accordance with the EORE AG Terms of Reference. The organisations indicated as lead for each given activity are responsible for actively driving the activity and providing any associated resources (human or financial) for its realisation – while recognising that this work plan may need to be adapted through the year in light of changing circumstances.

At the same time, the AG remains a collaborative body that acts in consensus, and as such members should be consulted at relevant decision points, and any formal outputs (recommendations, guidance notes, etc) attributable to the AG will be submitted for vote. While remaining independent, the AG will maintain regular contact with the Mine Action Area of Responsibility (MA AoR), the Inter-Agency Coordination Group on Mine Action (IACG-MA), the international MRE Working Group (iMREWG) and other relevant stakeholders wherever appropriate and feasible to ensure synergies are maximised and duplication avoided.

The outputs will be monitored on an annual basis, including through an annual survey of EORE stakeholders. A report on work plan implementation, as well as sectoral outcomes observed, should ideally be submitted to the AG membership by the end of Q1 of the following year.

1. QUALITY MANAGEMENT				
The EORE AG supports the sector to improve the overall quality, coverage, capacity and professionalism of EORE. This includes providing guidance to ensure that risk education standards, guidelines, methods and approaches are relevant, effective, adapted to emerging threats and requirements and that risk education is well integrated in mine action programmes.

Notes

- Activities led by the AG are attributable to the EORE AG.
- Activities led by individual or groups of members indicate a contribution from the AG. In these cases, inclusion of the activity in the work plan signals consensus on the need and can therefore be leveraged for securing buy-in, funding, prioritisation, participation, etc. Input from AG members or the AG as a whole (including by vote) may also be sought for these outputs.
- Activities led by “AG members” (core, associate and observer members) are individual efforts that members are asked to conduct, when feasible and appropriate.

Assumptions

The above work plan takes into account the following assumptions:

- Core and other members participate actively in the design and implementation of the work plan.
- Synergies and complementarities identified in the work plan continue to be prioritised by other relevant coordination/cooperation bodies.
- Lead organisations are able to provide required human and financial resources to drive the implementation of their respective activities.
- Co-funding is provided for the GICHD’s support to the risk education pillar through the EORE AG (as Secretariat).
- Conditions are in place for implementation of the work plan.
