

OTHER EQUIPMENT

MK Delta Robot

Applications

Handheld
Demining tools

Types

Metal detectors (MD)

Last update

01/01/1970

General description

Delta Robot is a three-legged robot for fast and exceptionally precise movements and it is custom designed for Mine Kafon Manta. The Delta Robot is made to fly over flat surfaces such as sand dunes or desert fields.

Working characteristics

The Delta Robot can extend itself up to 40cm to the ground and it has a swapping movement, which allows the detector to scan the ground precisely for metals. It can be also used with the Gripper to move in different directions for exploration tasks

Dimensional data

Length	400 mm
Weight	3 kg
Transport case provided	1
Transport case weight	7 kg
Case dimensions	47.3 × 36 × 19.6 cm

Factory support data

Factory support	Yes. Call center and field support if necessary
Warranty	1 year
Humidity (limitations)	splash proof
Water resistant	1
Temperature limitations	-40 to +60 degrees celsius

Price

Base price	33000 €
Reduction for higher quantity	depends on order
Possible to rent	1
Price for training	can be part of a leasing package

Other

Additional equipment	Further add-ons
