General description

We design and manufacture static visual mock-ups and fully functional IED training devices. Functional devices include features such as sirens, LEDs, and any of our battlefield effects. Our IED training aids do not contain any energetic or hazardous materials and can be configured to many standards.

Working characteristics

IED recognition and defeat are critical skill sets that demand deliberate focus and emphasis when training to confront the largest threat to national security and public safety. Inert Products specializes in producing static visual mock-ups of devices and fully functional IED training systems used to aid in their recognition and defeat. Our range of manufacturing options offers capabilities not found elsewhere. Optional product features allow customers to choose from basic static classroom mock-ups, specialized x-ray correct devices for security screening and testing, reactive devices with internal monitor features like buzzers, lights, and sirens, and functional wireless monitored systems controlling battlefield effects. Our IED training aids do not contain any energetic or hazardous materials. The possibilities of customizing any product are virtually endless. Contact us to discuss your specific training requirements.
