

PPE

ROFI Ravelin MKII Demining Vest

Applications

Handheld
Protective clothing

Types

Metal detectors (MD)

Last update

01/01/1970

General description

The ROFI Ravelin MKII protective clothing consists of a vest unit covering the front, abdomen, sides, shoulders and neck, and a lower protection panel that cover the abdomen, sides and groin.

Working characteristics

The ROFI Ravelin MKII demining vest is designed in order to meet the specific requirements for demining in tropical climate. The design is a combination of our two models Ravelin and Armadillo. The vest facilitates protection for the deminers when in upright position operating the metal detector, as well as in both squatting and kneeling position during prodding. We offer two different versions of the ROFI Ravelin vest: • Open Back strap system, OB • Protected Back, PB The ballistic inserts of the vest can easily be removed, and the outer cover can be washed in a washing machine in 40oC.
