

PPE

# F0rce Ware Bomb Blanket

## Applications

Handheld  
Blast resistant tools

## Types

Metal detectors (MD)

## Last update

30/04/3674

## General description

Bomb Blanket

## Working characteristics

Force Ware Bomb Blankets and Safety Circles are designed to protect property and personnel from the blast and fragmentation occurring when an IED explodes. Working in conjunction with the Safety Circle the blankets are especially useful for suspect items such as backpacks or briefcases. The diameter of the closed Safety Circle is variable from 40 to 70 cm. The Protection class is the same as the Bomb Blanket. Bomb Blankets are an ideal first tool to fend threats in busy public places such as airports and train stations.

## Dimensional data

<b>Weight</b>	14 kg
<b>Sizes available</b>	150 x 150 cm ... 200 x 200 cm
<b>Transport case provided</b>	1

## Factory support data

<b>Warranty</b>	5 years for ballistic inner / 1 year outer
-----------------	--------------------------------------------

## Other

<b>Colours available</b>	Black
--------------------------	-------

## Protective performance

<b>Protection level note</b>	Other protection levels available such as 400 m/s and 650 m/s
<b>Protection level</b>	v50 = 500 m/s according to STANAG 2920
