

PPE

Force Ware Bomb Blanket

Applications

Handheld
Blast resistant tools

Types

Metal detectors (MD)

Last update

07/12/3674

General description

Bomb Blanket

Working characteristics

Force Ware Bomb Blankets and Safety Circles are designed to protect property and personnel from the blast and fragmentation occurring when an IED explodes. Working in conjunction with the Safety Circle the blankets are especially useful for suspect items such as backpacks or briefcases. The diameter of the closed Safety Circle is variable from 40 to 70 cm. The Protection class is the same as the Bomb Blanket. Bomb Blankets are an ideal first tool to fend threats in busy public places such as airports and train stations.

Dimensional data

Weight	14 kg
Sizes available	150 x 150 cm ... 200 x 200 cm
Transport case provided	1
