01/01/1970

## General description

Mine Protection Suit is designed in consideration of mine clearance standards. Aramid protective layer provides protection against fragmentation effects of mines, bombs and cannon balls. The suit has been indigenous to the importance of mine detection and clearance activities. It offers its light, flexible and protective structure in the best combination, thus it has become one of the most important equipment of the deminer teams. The suit can be provided with an optional miner visor, hand guard, prodding needle and deminer boat.
