

PPE

# SD HAWK APRON

## Applications

Handheld  
Protective clothing

## Types

Metal detectors (MD)

## Last update

01/01/1970

## General description

Always aiming to achieve comfort and value for money, our Hawk body-armour (NATO STANAG 2920 V50 – 450m/s) is versatile enough for deminers and supervisors, providing vital area protection whether walking around or excavating anti-personnel mines. It is lighter and more comfortable than alternatives, and includes several special design features. Shown worn by Emanuel Jeche, height 1.91m. The Hawk body-armour can be worn short, medium or long, depending on your activity at the time. Adjustment is as simple as unfastening a Velcro tab

## Working characteristics

With a multi-layer Kevlar/aramid inner covered by a removable washable cover, it weighs a mere 2.5kg. The shoulder- straps are partly elasticated. After adjustment to suit the individual, they need not be undone again. The Hawk includes genital-protection that can be worn when wanted, and folded away inside the armour cover when it is not wanted

## Dimensional data

Weight	2.5 kg
Sizes available	S, M, L, XL

## Factory support data

Warranty	12 months
